

CardioDesign™

Heart Health Support Dietary Supplement

CardioDesign™ is the premier heart health product on the market. It supports key areas of cardiovascular concern.

CardioDesign is an advanced formula to support cardiac health, and to help maintain normal muscle function and circulation.

Cardio Design uses a unique non-flush niacin.

CardioDesign helps maintain healthy cholesterol levels, supports the heart muscle, and keeps blood vessels toned and flexible for improved circulation.

Key Ingredients of CardioDesign:

Red Rice Yeast Extract - Helps maintain healthy cholesterol levels.

Inositol (as 250mg inositol hexanicotinate) - Provides a unique non-flush form of niacin to maintain healthy cholesterol levels.

L-Proline – An amino acid that helps support arteries and blood vessels.

Alpha Lipoic Acid (ALA) – Assists in producing cellular energy, which supports the heart. ALA is a valuable antioxidant that helps protect the body against damaging free radicals. Unlike other antioxidants, ALA is both fat and water soluble, enabling it to quench free radicals both inside the cells and outside. ALA also extends the life of other antioxidants, recharging them so that they can continue to protect the body.

Pure-gar Garlic Extract (10,000ppm allicin/g) – Known for its effects on maintaining healthy cholesterol levels.

Policosanol – Shown to help with cholesterol levels.

Supplement Facts

Quantity: 90 capsules

Serving Size: 1 Capsule	Amt Per Serving	%Daily Value
